

Vedanta Aluminium Strengthens Workplace Safety with Onsite Mock Drill at Jharsuguda

Jharsuguda: Vedanta Aluminium, India's largest producer of aluminium, in collaboration with the Directorate of Factories and Boilers, Government of Odisha, conducted a large-scale onsite mock drill within its mega aluminium plant in Jharsuguda. The initiative reaffirmed the company's commitment to ensuring complete workplace safety and a high level of emergency preparedness. The exercise

simulated a fire scenario in the fuel oil storage area of the unit's captive power plant (CPP) and was designed to test and enhance the plant's emergency response mechanisms for handling flammable liquids. The mock drill saw active participation from Vedanta's employees, including security personnel, the combat team, the fire

and rescue team, the auxiliary team and safety teams. Highlighting the importance of these exercises, C. Chandru, CEO - Vedanta Jharsuguda said, At Vedanta Aluminium, our vision of 'Zero Harm' guides every aspect of our operations. Initiatives like this mock drill play a crucial role in strengthening our emergency preparedness and fostering a culture of collective responsibility.
